

Dr. Keller's Blog

Wednesday, June 17, 2009

Students again attended both their morning and afternoon classes. The Lights, Camera, Action class went to ABC 33/40 to see how a news broadcast is produced. The Arts Experience class is just down the hall from my office, and they have turned a Biology lab into an elegant and eclectic art studio. Mrs. Summey was nice enough to save me a piece of her birthday cake, which she shared with the class.

Tonight the students will hear from Jeanna Westmoreland. Dr. Westmoreland is our President's wife and an accomplished educator with an academic specialty of gifted education. This will be the third time Dr. Westmoreland has given her presentation, which is a favorite among AGS students. Incidentally, Jeanna wanted to come to the opening ceremony, but she had just flown in from Indonesia the day before and was still on their time (12 hours' difference from Birmingham).
